INTEGRATED POOLS CLEAR VIEW

Fun and functionality combine in this statement lap pool

When the owners of this Canterbury property were briefing the architects at Integrated Pools by Canny with their requirements for a new outdoor haven, the wish list included a water feature abutting the house. They also wanted an alfresco area that could be viewed from all the main rooms, whilst taking advantage of the northerly aspect.

The design team exceeded the expectations of the home owners, creating this stunning lap pool and water feature, with the 'floating deck' a focal point of the overall entertaining area.

The fully tiled pool with granite stepping stones marries beautifully with the stonework of the adjacent alfresco

area. Adding to the effect is Spotted Gum decking, which continues the theme from the polished floorboards of the main indoor living area to create a beautiful, welcoming flow to the outdoors.

The 15m x 2m lap lane adds functionality to the pool, whilst continuing the concept of a wrap-around water feature. Fitted with in-floor cleaning, solar heating, premium filtration and salt chlorination, the easy-maintenance pool will look perfect year-round with minimum fuss.

Integrated Pools is a division of Canny, renowned as one of Melbourne's leading design and building companies. They have an in-house team of architects and designers who

can produce a truly unique concept for your entire outdoor living area.

With all services under one roof, from design, engineering, documentation and construction, they can provide an integrated solution and coordinated approach to even the most demanding and intricate projects.

In business for 18 years, the company produce around 20-30 projects each year in Melbourne's inner-east, bayside and Mornington Peninsula suburbs. It is a member of SPASA, HIA and MBA and has won numerous awards for its work. ■
