

INTEGRATED POOLS

SEAMLESS FLOW

DESIGN HARMONY, INSIDE AND OUT

The stunning swimming pool in the leafy suburb of Kew illustrates the value in marrying concept, design and construction together to produce perfect results.

Integrated Pools, a division of the Canny Group, along with the Canny Design team, has delivered a result that meets the clients' brief, fulfilling all their expectations and wishes.

The seamless transition from the original front section of the home to the contemporary extension at the rear is accentuated by the flow of the pool's lap lane, which opens out to a large play area as it wraps around the home. The pool thus becomes the focal point of the extension thanks to the views from within the house and the rear garden.

The choice of tile colour for the pool interior – a gun-metal grey – allows a beautiful play of light in the north-facing family areas. Reflections from the pool to the kitchen and living area, and on to the open canopy above, create a very soothing, tranquil feeling. The colours and materials used externally were mirrored internally to create the feeling of flow between the interior and exterior of the home.

This swimming pool project works on many levels; it possesses style while injecting an overall feeling of tranquility. The seamless integration of the pool within the confined space and the practicality of the pool's dimensions is another exceptional aspect of the design.

Integrated Pools is a division of Canny, renowned as one of Melbourne's leading design and construction companies. With an in-house team of architects and designers, the company can produce a truly unique concept for your entire outdoor living area.

Integrated Pools is a member of the Swimming Pool and Spa Association of Victoria (SPASA) and offers all services under one roof, from design, engineering, documentation and construction. It can provide integrated solutions and a coordinated approach for even the most demanding and intricate projects.
